## My T by 5LAB

This accessory's purpose is to serve as a table for a casual dinner or a snack in a terrace. Aimed for those smaller terraces that don't fit a regular table.

**5LAB** is a team of architects and designers working in Barcelona that marry **design** with functionality caring specially for the existing and aiming to create discreet interventions, risky designs and new ideas.

The **My T** accessory for small terraces and balconies is the perfect product for those with limited space that still want to have a good time outdoors. The system is made of two wooden pieces that are joint by a metal frame. One of the pieces goes vertically and is prepared to be hanged of the handrail so that it supports the horizontal one that is width adjustable and, at the same time, avoids any object placed on the table to fell off the balcony. There is a hole in the middle of the horizontal board that allows to put in a bottle or a bucket of flowers for the object to be more fun and customizable.
